

# Water Wells: Construction & Reconstruction

## WATER WELL COMPLETION DIAGRAM USING SUBMERSIBLE PUMP WITH PITLESS

This table complies with the Reno County Sanitation Code, Chapter 3, Article 3, Section 4, which in turn complies with Article 30 which is Kansas Administrative Regulation (K.A.R. 28-30-1 thru 207) and Article 12 which is Kansas Statutes Annotated (K.S.A.82a-1201 thru 1219.)

Well Components	Property Owner	Water Well Contractor	Others (Plumbers, etc.)
Casing or casing alterations	X	X	Not allowed
Sanitary Seal Cap	X	X	X
Vent	X	X	X
Pump	X	X	X
Pitless Adaptor	X	X	Not allowed
Conduit or Electrical Service	X	X	X
Disinfection	X	X	X

- The Reno County Health Department will require and insure upon inspection that a Kansas Licensed Water Well Contractor has performed the construction or reconstruction of all water wells involving (1) the casing or casing alterations, and (2) installation of a pitless adaptor. The only exceptions to this requirement are when:
  - an individual is constructing, reconstructing or treating a water well located on land owned by the same individual, when the well is used by the individual for farming, ranching, or agricultural purposes or for domestic purposes at the individual's place of abode; or
  - an individual performs labor or services for a Licensed Water Well Contractor at the Contractor's direction and under the Contractor's supervision.
- In conjunction with this final inspection, the property owner or his/her agent will be required to furnish **a copy of the bill, receipt, or written statement** from a Kansas Licensed Water Well Contractor for work involving casing construction, casing alterations and connection of a pitless adaptor. If the work was performed by the owner, a verified statement to that effect will be required.
- If Environmental Staff are present during the construction or reconstruction, no written verification is needed.
